# Message from the Chief Executive Officer

At Codefixbug, we are driven by a clear purpose: delivering innovative, reliable, and user-focused digital solutions that help businesses grow and operate more efficiently.

As Chief Executive Officer, I am proud to lead a team of highly skilled professionals who are passionate about transforming complex challenges into scalable, practical, and impactful technology solutions. Our commitment to excellence, professionalism, and continuous innovation defines everything we do.

Over the years, we have partnered with organizations across diverse industries to streamline operations, improve digital workflows, and create sustainable business value. Backed by extensive industry experience and a strong technical foundation, we combine global best practices with strategic insight to deliver solutions that meet today's demands and prepare businesses for the future.

At Codefixbug, we believe successful digital transformation goes beyond technology—it is built on trust, collaboration, and measurable results. We remain committed to helping our clients achieve long-term growth through quality-driven services and customer-centric innovation.

Thank you for trusting us to be part of your digital journey.

**Emmanuel E. Akuete**

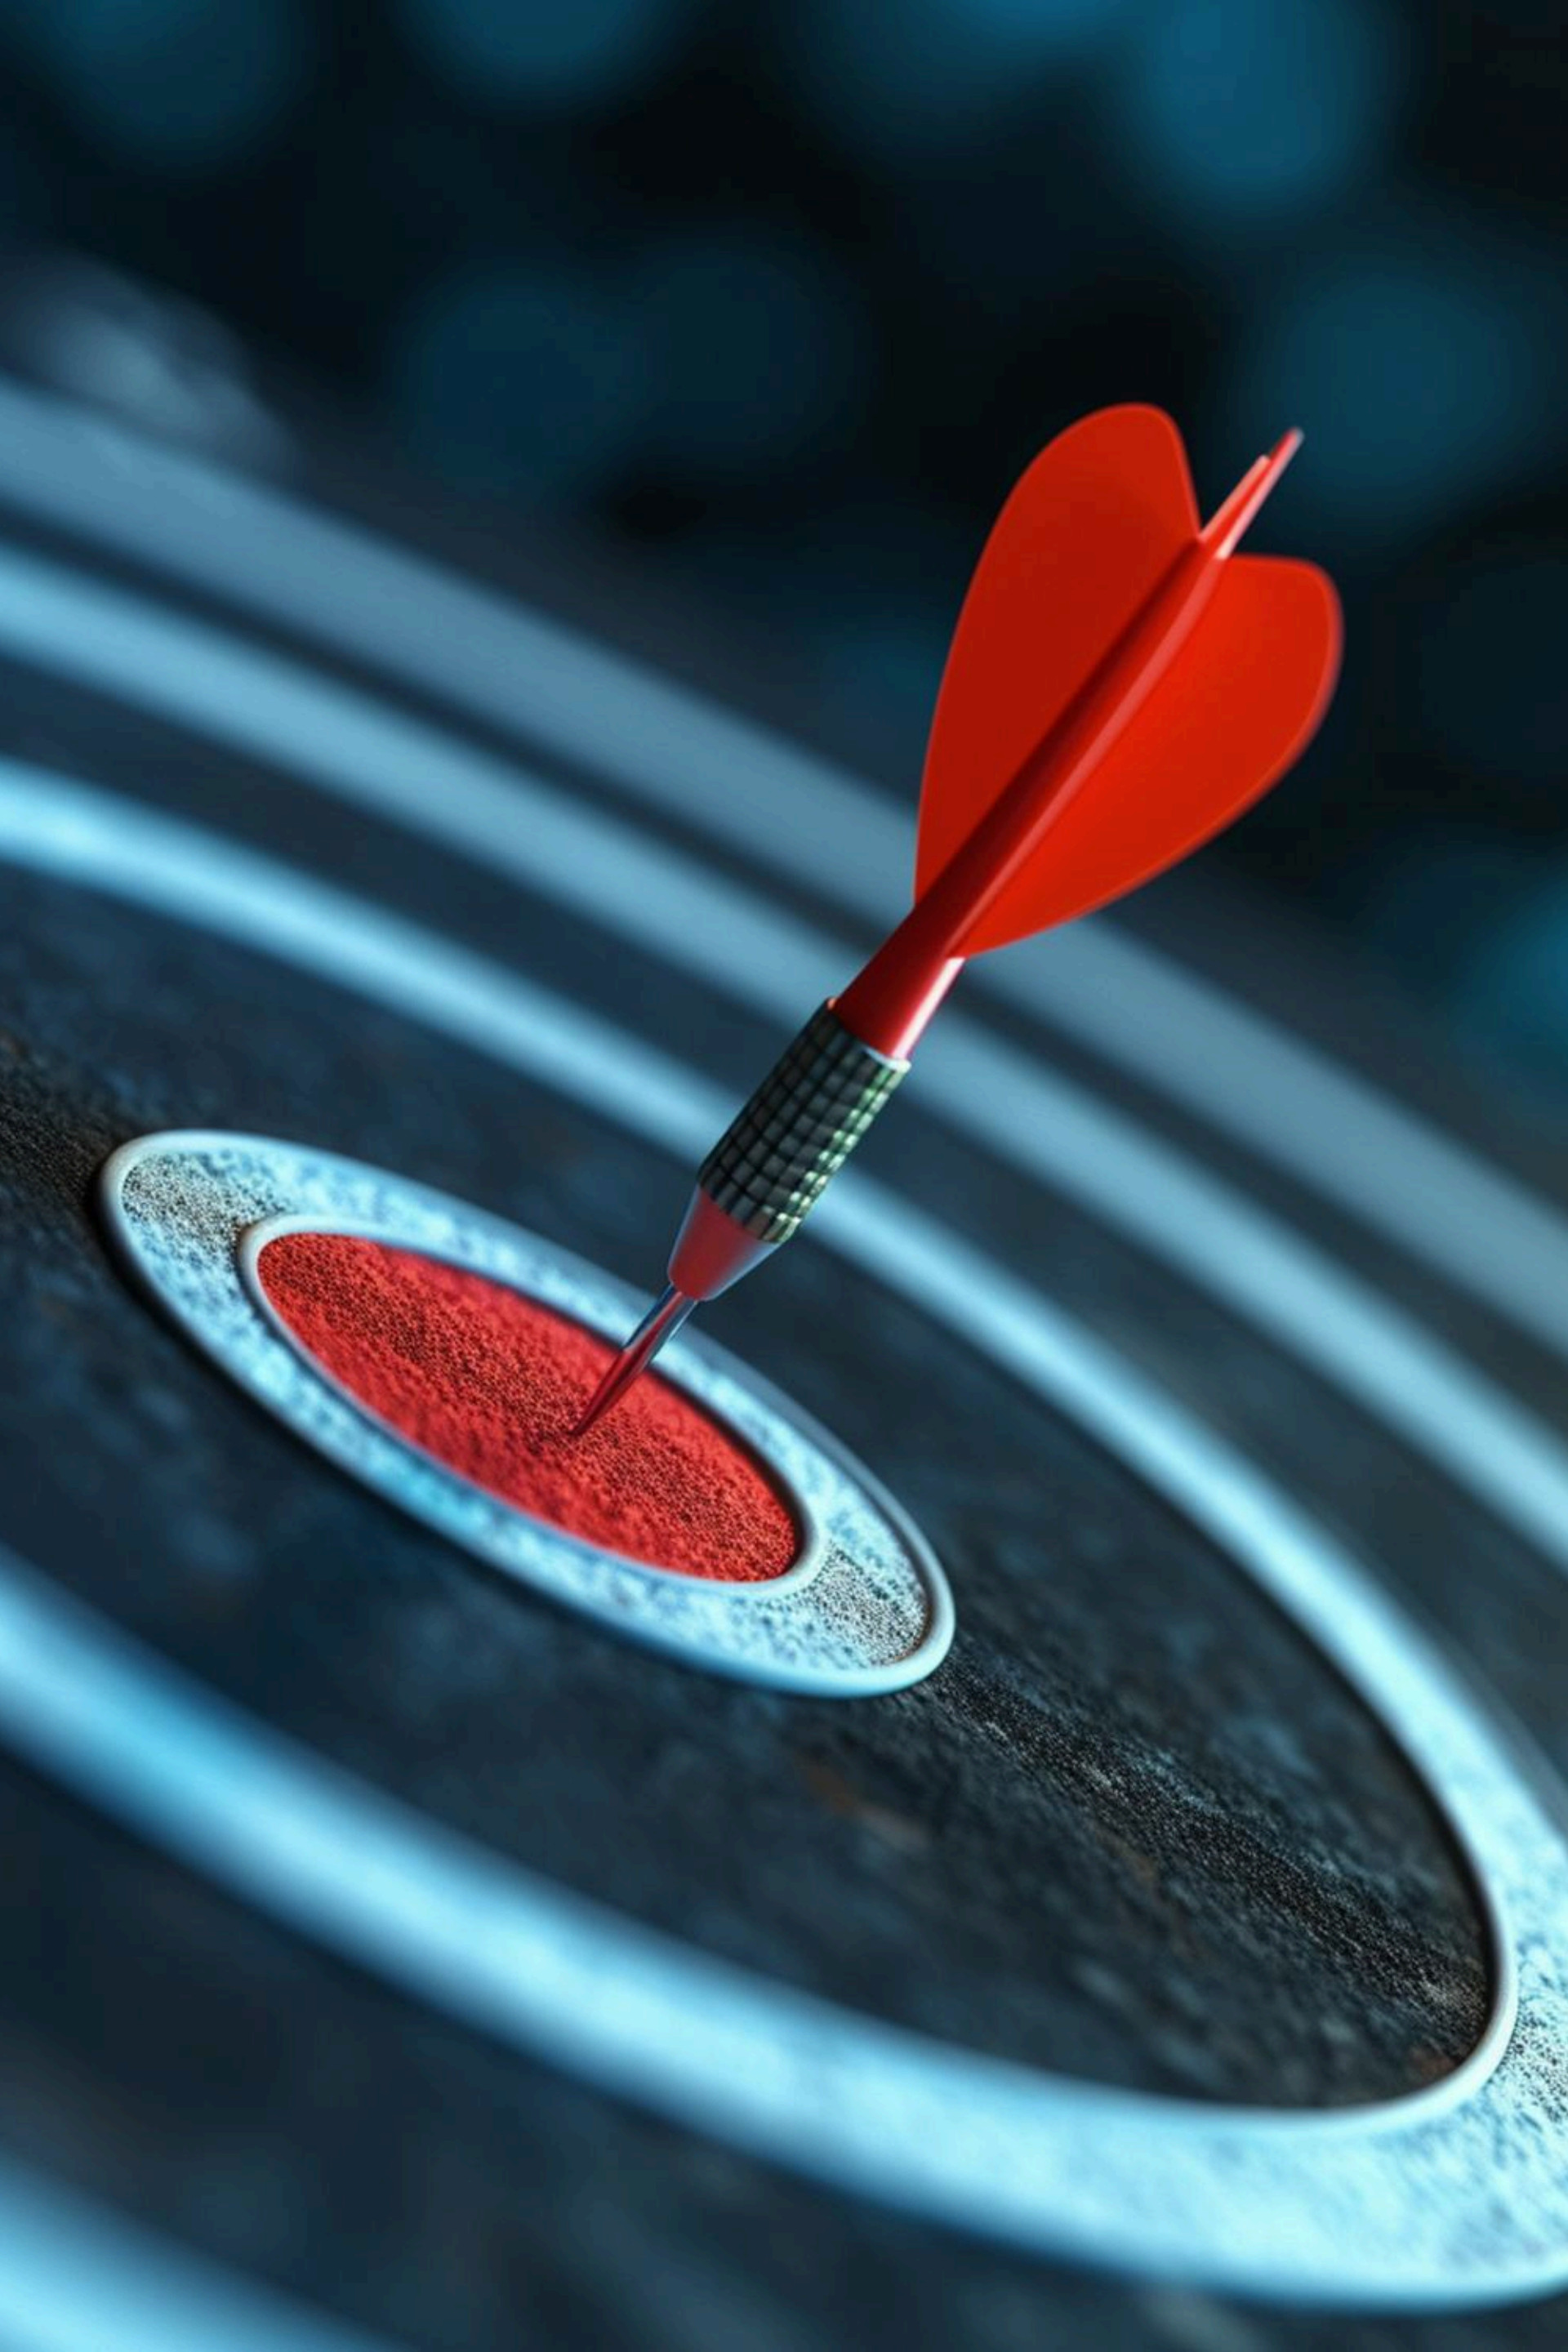

*Chief Executive Officer*

# About Us

Codefixbug Limited is a forward thinking software development company based in Nigeria, delivering world class web, mobile, and cloud solutions to clients across industries and continents. With over seven years of proven expertise, we have built a strong reputation for helping startups, SMEs, and large enterprises transform ideas into powerful, scalable digital products.

At Codefixbug, we are more than developers. We are innovators, problem solvers, and growth partners. Our remote first team leverages technology, creativity, and strategic thinking to craft tailored ICT solutions that enhance efficiency, improve user experiences, and drive measurable business outcomes. From custom software and mobile apps to UI/UX design, IoT, and cloud services, we empower organizations to scale, adapt, and lead in the digital era.

# Our Mission

**Our Mission** is to empower global organizations by leveraging technology to solve challenges, create value, and drive profitability. We combine technical excellence with exceptional customer service to make your business more agile and your team more productive.

# Our Product

## Create Tribute

Recharge2Cash makes it possible for users of its platform to convert airtime to money deposited into your bank account. It boasts as one of the fastest airtime converters in Nigeria with 99% automated transactions, with new features which include Dedicated airtime to cash wallet, availability of VTU, Bill Payments, Agent account, Virtual Account Number for instant wallet funding, Instant withdrawal, Simplified Verification process, Instant Data Top-up among others.

Over the past few years, we have been working closely with Softgid Consult and Global Investment Ltd the parent company of the digital product, to simplify their process, build their product, implement 3rd parties APIs, build robust back-office administrative tools, maintain and support the product, handle issues that came with growth, and also constantly celebrating their milestones achievements overtime.

# Case Study

## FIDA Nigeria

We are super excited to share, that we have been working closely with the International Federation of Women Lawyers (FIDA) Nigeria, and her partners to build, test and deploy its National Data Collection Portal, and also its National Membership Portal. These digital solutions will go a long way in solving problems, and simplify the processes for the Non-Governmental and Non-Profit organization FIDA.

# Case Study

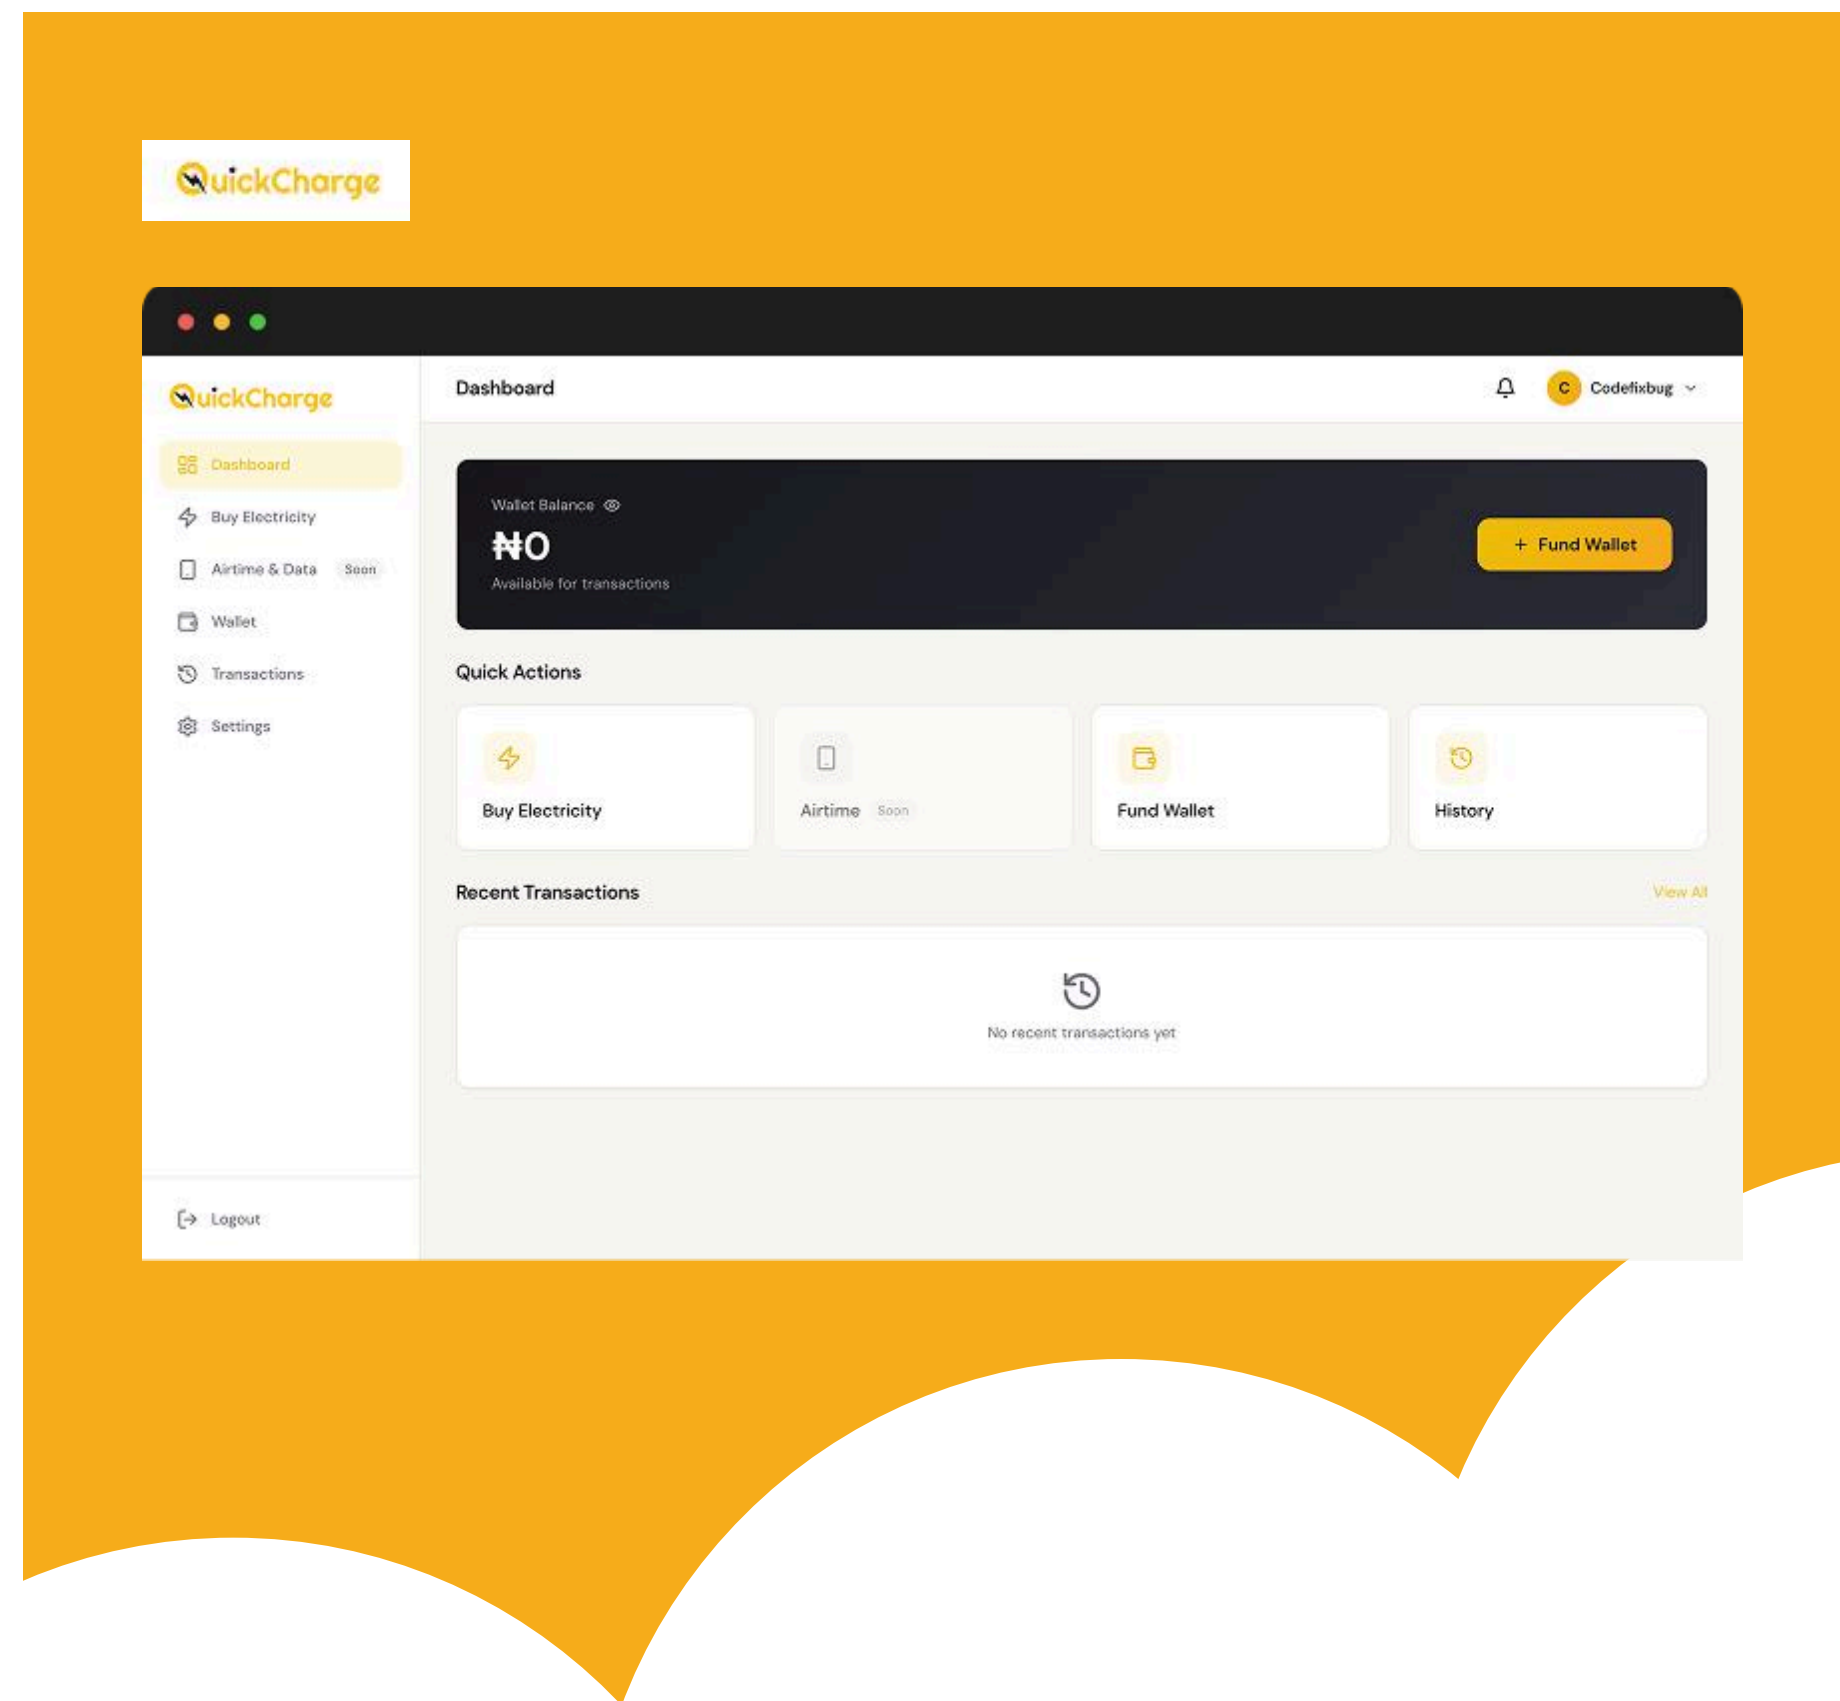

## Donem Cargo

We worked closely with Donem International LLC to conceptualize, design, and develop a comprehensive mobile application called Donem Cargo, tailored to meet the needs of both their existing and prospective customer base. The primary goal was to offer a user-friendly platform enabling seamless shipment creation and management. This involved an intensive three-month-long process of working with the parent company. We dedicated our efforts to designing, developing, rigorously testing, debugging, and ultimately deploying the Android and iOS applications, along with an efficient admin management portal.

## QuickCharge

QuickCharge is a web application that simplifies utility payments, making them fast, secure, and reliable. QuickCharge allows individuals, households, and businesses to easily recharge their electricity prepaid or postpaid meters through a seamless, user-friendly platform.

Our team worked hand-in-hand with QuickCharge Solutions throughout the entire process from concept to deployment. We designed the landing page, developed the web application, and created a robust admin management system. Thorough unit testing ensured that all features functioned smoothly, meeting the client's high standards.

## Payvidence

We worked closely with Techpira Evolutions Limited to build their digital product Payvidence, a receipts, invoices and inventory management platform built for Nigerian Small and medium enterprises. Payvidence simplifies day-to-day business operations with powerful tools for receipts and invoices, business management, sales tracking, and reports and insights. Built with the unique needs of local businesses in mind, Payvidence helps SMEs work smarter, stay organized, and make informed decisions with ease.

## Blastily

We worked closely with Blastily Limited, a Canadian-based, Nigerian-owned startup, to develop Blastily, a dynamic cross-border marketing platform designed to transform how businesses engage with audiences across the globe. Blastily empowers brands to increase their visibility through a broad range of marketing channels, including radio, billboards, television, publications, and more. With an expansive reach across Africa and global markets, the platform provides businesses with strategic solutions to connect with new audiences, enhance their presence, and drive growth.

## Bundlegram

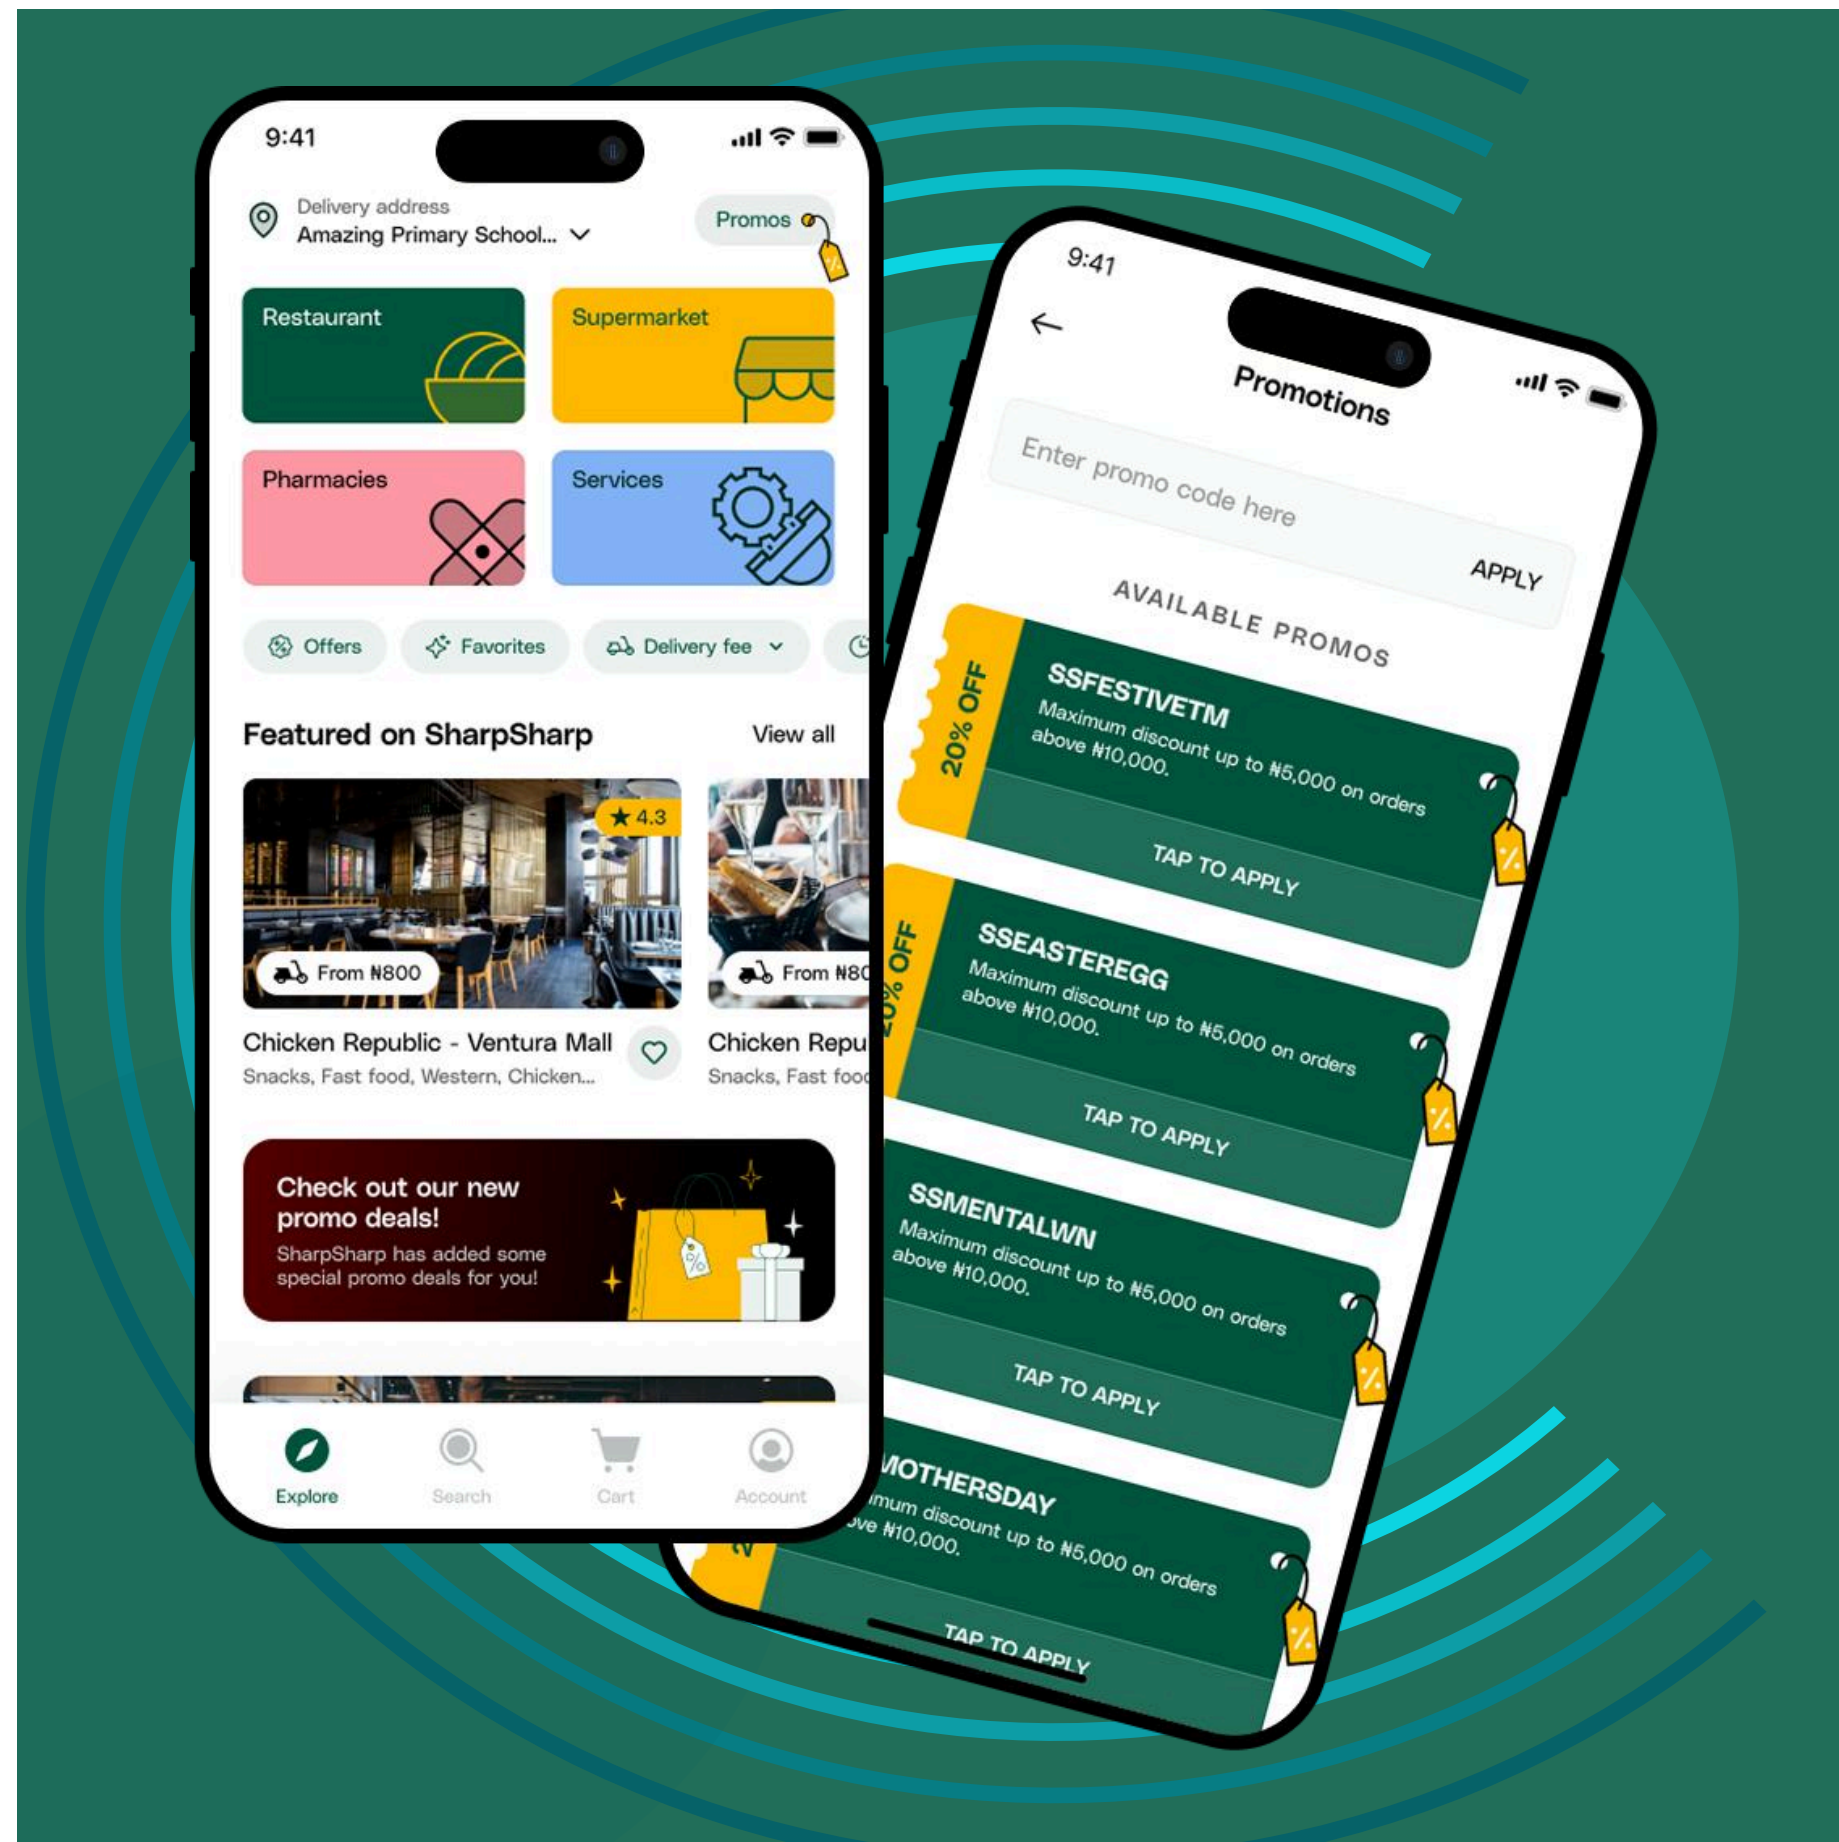

We worked closely with Bundlegram Ventures to design, develop, and launch their new mobile application, a major milestone in their mission to simplify and enhance everyday payment experiences. Over the course of three months, our teams transformed their trusted web-based platform into a fully optimized mobile experience.

Previously, Bundlegram users could easily pay for essential services through their web platform. The new application empowers users to conveniently and securely manage payments for a variety of essential services from their smartphones, whether they are at home, at work, or on the go. With the mobile application now available for download on both the Google Play Store and the Apple App Store, users can enjoy a seamless and accessible payment experience across all devices.

# Case Study

## SharpSharp

The CEO of Perks SharpSharp Technologies Ltd had a goal to build a regional-focused platform where users could seamlessly engage in everyday activities—whether it's ordering food, groceries, requesting the services of skilled professionals like plumbers and electricians, or making hotel and Airbnb reservations within the state.

The first phase involved selecting the right brand identity, followed by an extensive UI/UX design and workflow planning. This stage required meticulous collaboration, including extensive user research, to ensure the app would be intuitive and user-friendly while delivering a rich experience. From the first screens to the final designs in Figma, we created an app that met the company's requirements. Several improvements were incorporated, and once the designs were approved, we moved on to development.

# Codefixbug at EFCC's First e-Auction

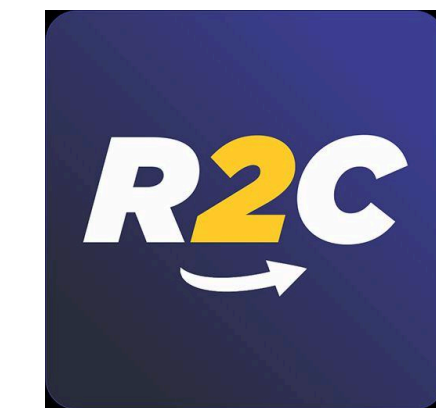

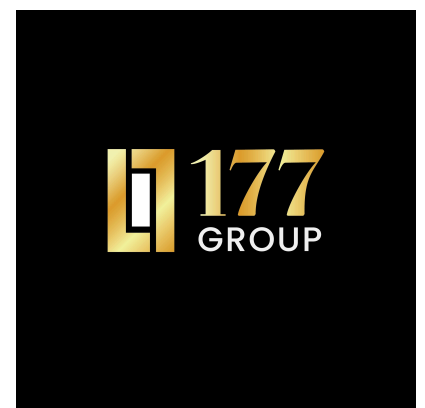

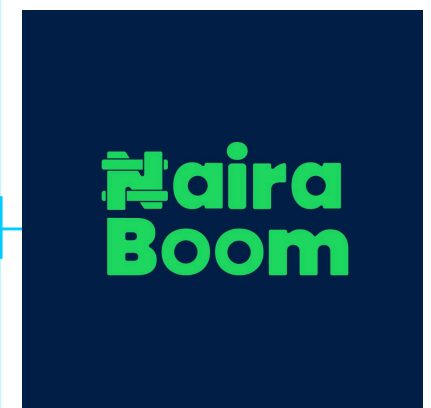

## Powering Five Auctioneers Using Technology

The EFCC e-Auction was introduced to enhance transparency and public participation in the disposal of forfeited assets through a secure, technology-driven process. Ahead of the initiative, our company had already built a proven e-Auction platform and went on to support five of the sixteen EFCC-approved auctioneers (31.25%)—Kamyus Consult Limited, Fagobe Company Limited, Aikson Nwankwo Distribution Services, PSC International Investment Limited, and Richmate 480 Nig Ltd. We designed and deployed EFCC-compliant auction platforms for these firms and supported the asset cataloguing of 248 vehicles across multiple states, including the development of a mobile tool that enabled real-time capture and upload of asset data.

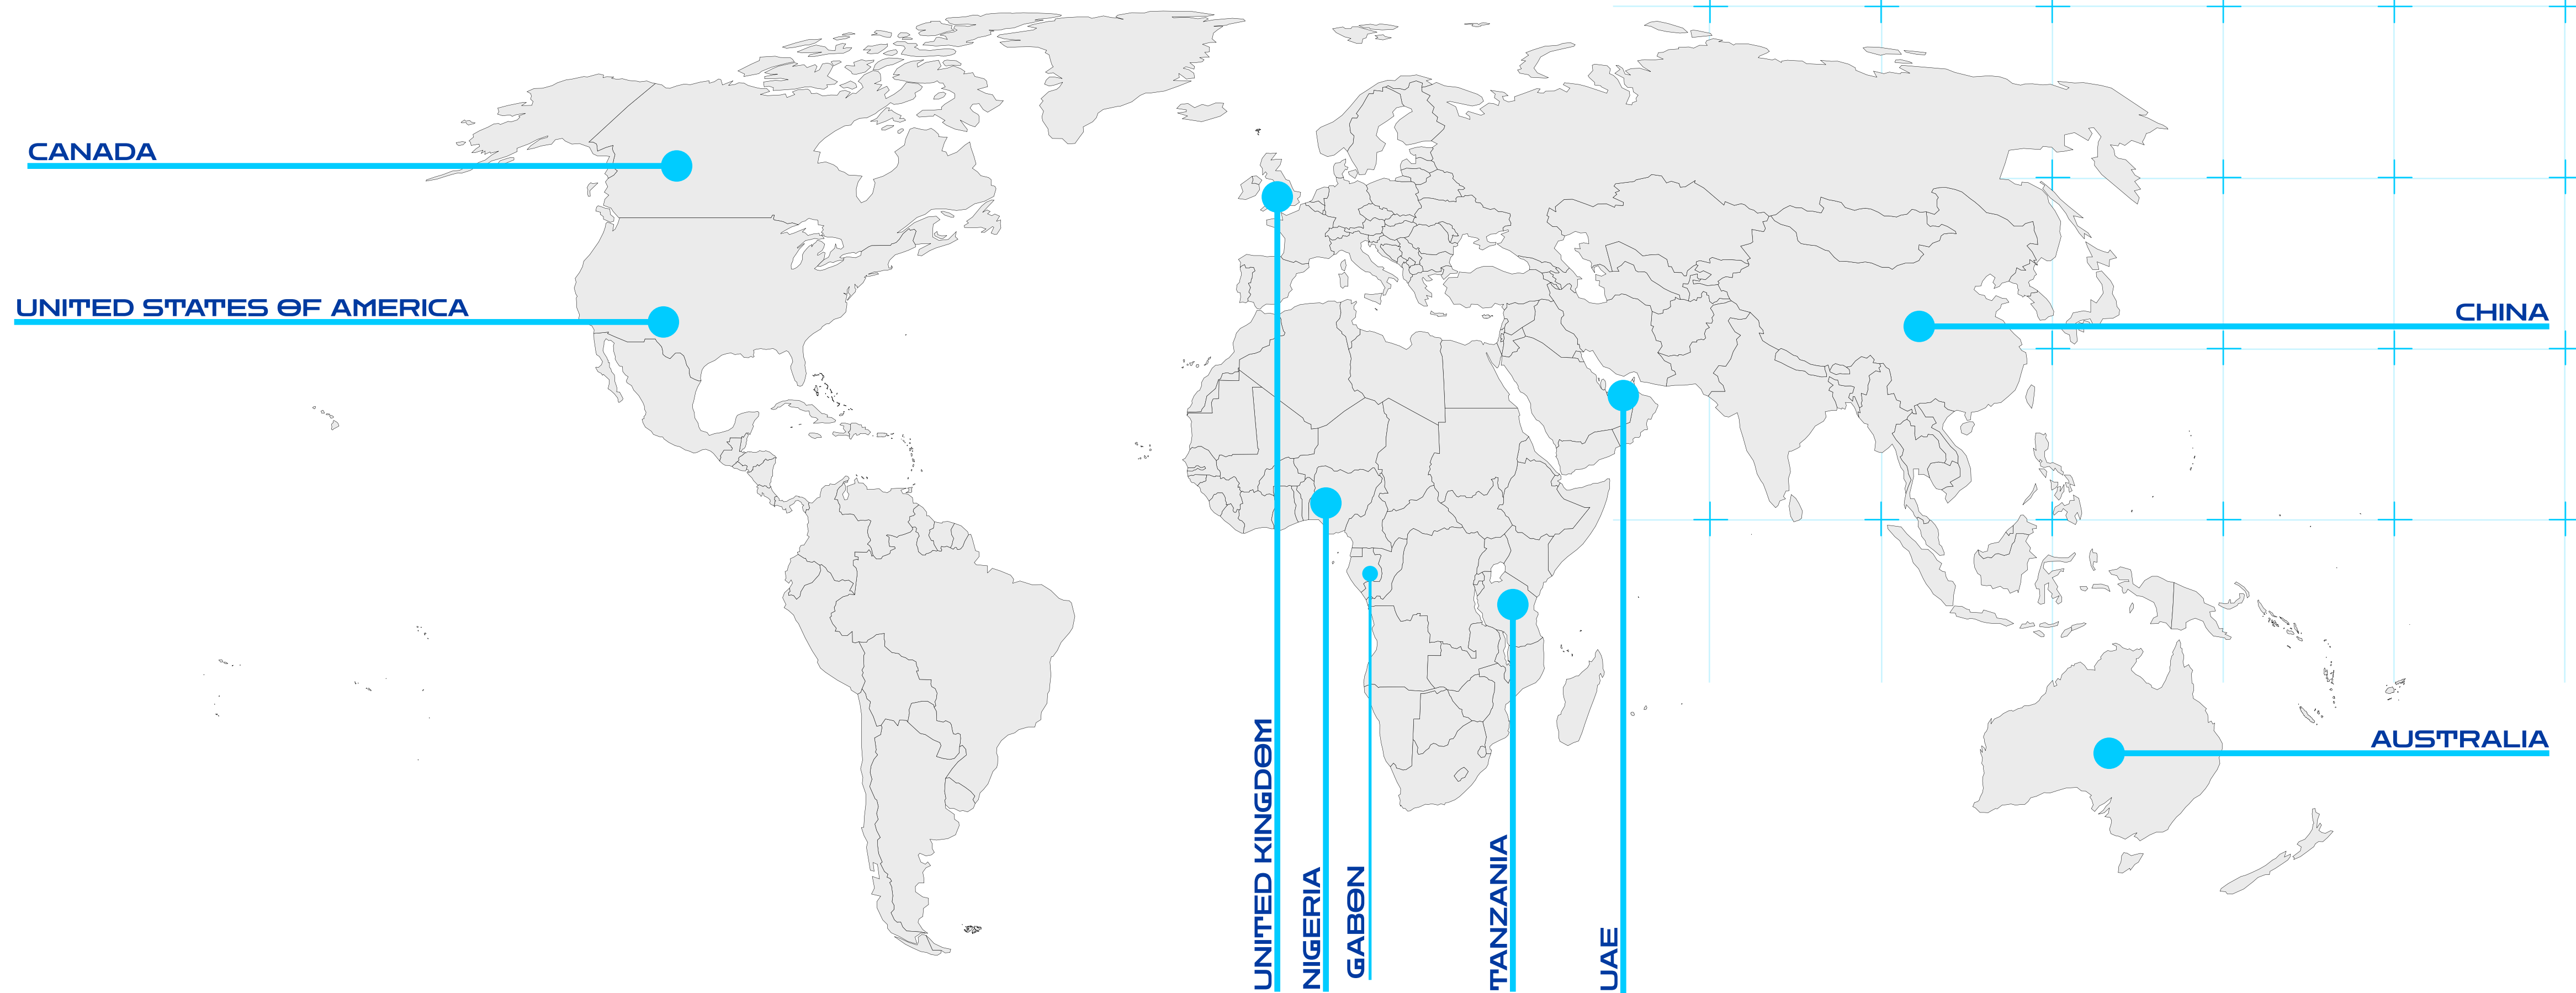

During the January 27, 2025 nationwide auction, we handled platform configuration, testing, security, and live support. Our infrastructure successfully managed heavy traffic, thousands of concurrent bids, and DDoS attacks while maintaining system stability. Across our clients' platforms, over 10,000 bids and 42,000+ bid actions were recorded with fully protected bid histories and transparent winner selection, contributing significantly to the success of the EFCC's first major digital e-Auction.
